

Carbon Reduction Plan

Supplier name: Homecare Direct Limited

Publication date: 13/11/2024

Commitment to achieving Net Zero

Homecare Direct Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2023/2024	
Additional Details relating to the Baseline Emissions calculations.	
This is our first Carbon Reduction Plan. Employee commuting figures are based on estimates. Our baseline may be adjusted when the results of an extensive employee survey are available.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	18.64
Scope 2	5.83
Scope 3 (Included Sources)	165.52 Upstream transportation & distribution: 0* Downstream transportation & distribution: 0* Business travel: 23.92 Employee commuting: 133.86 Employee teleworking: 7.74 Waste generated in operations: 0** *This is a service-based business with no physical products being transported **This is a office based business with no formal waste monitoring and negligible emissions arising from waste generated
Total Emissions	190

Current Emissions Reporting

Reporting Year: 2023/2024	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	18.64
Scope 2	5.83
Scope 3 (Included Sources)	165.52 Upstream transportation & distribution: 0* Downstream transportation & distribution: 0* Business travel: 23.92 Employee commuting: 133.86 Employee teleworking: 7.74 Waste generated in operations: 0** *This is a service-based business with no physical products being transported **This is a office based business with no formal waste monitoring and negligible emissions arising from waste generated
Total Emissions	190

Emissions reduction targets

We have recently implemented the following measures to reduce our carbon footprint:

Holding remote meetings to eliminate unnecessary travel.

Turning off unused lights and equipment.

Minimising waste through recycling.

Encouraging suppliers to make their own commitment to Net Zero.

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 171 tCO₂e by 2029. This is a reduction of 10%.

Carbon Reduction Projects

In the future we hope to implement further measures such as:

Educating employees on reducing their own carbon footprint at work and at home.

Subsidised public transport passes, to encourage employees to use public transport thereby reducing our single largest source of carbon emission.

Smart thermostats at our head office.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Name: Kaileigh Shaw
